

Basic-Line Pressing Unit AFP 101

The new measure in pressfitting technology

The pressing unit AFP 101 offers a wide range of applications and is characterised by smallest dimensions and straight-forward handling. Pressfitting joints of up to 28 mm with metal and up to 40 mm with plastic materials are performed safely and easily. The bolt retention always ensures the proper fit of the press-jaw. The small and handy unit allows easy access even to narrowest pressing points and installation environments. Low weight and ergonomic design enable real onehand operation of the device and the press-jaw. The powerful battery gives the endurance needed.

novopress

Basic-Line Pressing Unit AFP 101

The pressing unit AFP 101 is used with the new Novopress press-jaws up to 28 mm (40 mm). The low-weighted, compact press-jaws form a perfect unity with the pressing unit AFP 101 and are optimized to meet all pressfitting-systems' specifications. The AFP 101 battery charger is available in all world-wide power supply specifications.

With our generous warranty services and the high quality standard you are working in complete safety.

Pressing Unit AFP 101 technical data

Dimensions:*	up to 28 mm metal pipe up to 40 mm plastic pipe
Weight:	1,9 kg
Length:	350 mm
Width:	62 mm
Height:	80 mm
Power consumption:	240 W
Piston force:	19 kN
Piston stroke:	30 mm
Battery:	9,6 V/1,3 Ah
Battery capacity**:	35 - 80 press cycles
Charging time:	approx. 60 min.

*system related

**depending on material and dimension
